SOFT PACK TREATMENT

The Soft Pack bed is similar to a waterbed. During the treatment, your body sinks and floats on the warm water (approx. 37 °C) without touching it. This creates a feeling of comfort and security.

The care product specially prepared for the treatment is applied to your body, and you are gently wrapped in a soft nonwoven cloth. Afterwards, you can float in the waterbed trough and enjoy a feeling of weightlessness. If desired, this can be enhanced with a gentle rocking motion. Your muscles will relax, your spine will be relieved,

and the perfect positioning of your body promises true well-being.

The gentle water pressure and slight warming of the body enhance the effects of the product, and the combination of foil, product and pressure increases the skin's absorption capacity by 60 %.

- Appointment required
